

“It’s **time to make** a **change...**”

LED lights are the most efficient, long-lasting lighting solution. With the lowest CO2 emissions, LED lights use up to 90% less energy, saving us money the more we use them.

We are committed to helping industry, businesses and households to use cheaper, more cost effective lighting solutions, and to bring down our energy consumption, collectively. A small and simple change - to make a huge reduction on our carbon footprint.

LedEcoLights.com is a leading supplier of high powered LED bulbs. All our products are direct replacements for your existing fittings.

With LedEcoLights.com changing your lighting to LED is easy.

Switch On To LED

Lighting is a huge energy user, accounting for up to 20% of all electricity usage in the average home or business. Global warming is THE major threat to our planet. We must reduce the way we consume energy, lower our carbon emissions, and protect our planet. The easiest option is to use energy saving lighting. Save up to 90% more energy from lights by simply switching to a new bulb!!! **It really is that simple.**

BUSINESSES START SAVING NOW :

- Save up to 90% off your lighting bill
- With a 50,000 hours lifetime, LED bulbs will last over 5 years!
- No need for maintenance and repairs to faulty or blown out bulbs
- A 'fit it and forget it' product
- LEDs are 100% recyclable
- Great news for all businesses – lower your costs and increase your energy efficiency in one go

SAVE COSTS, SAVE RESOURCES, SAVE ENERGY

Up to 90% more efficient than your average light bulb, LEDs used 1/10 of the electricity!

Dependant on how often you have the lights on, they will pay for themselves within a few months. Easy to install, our products require no additional wiring.

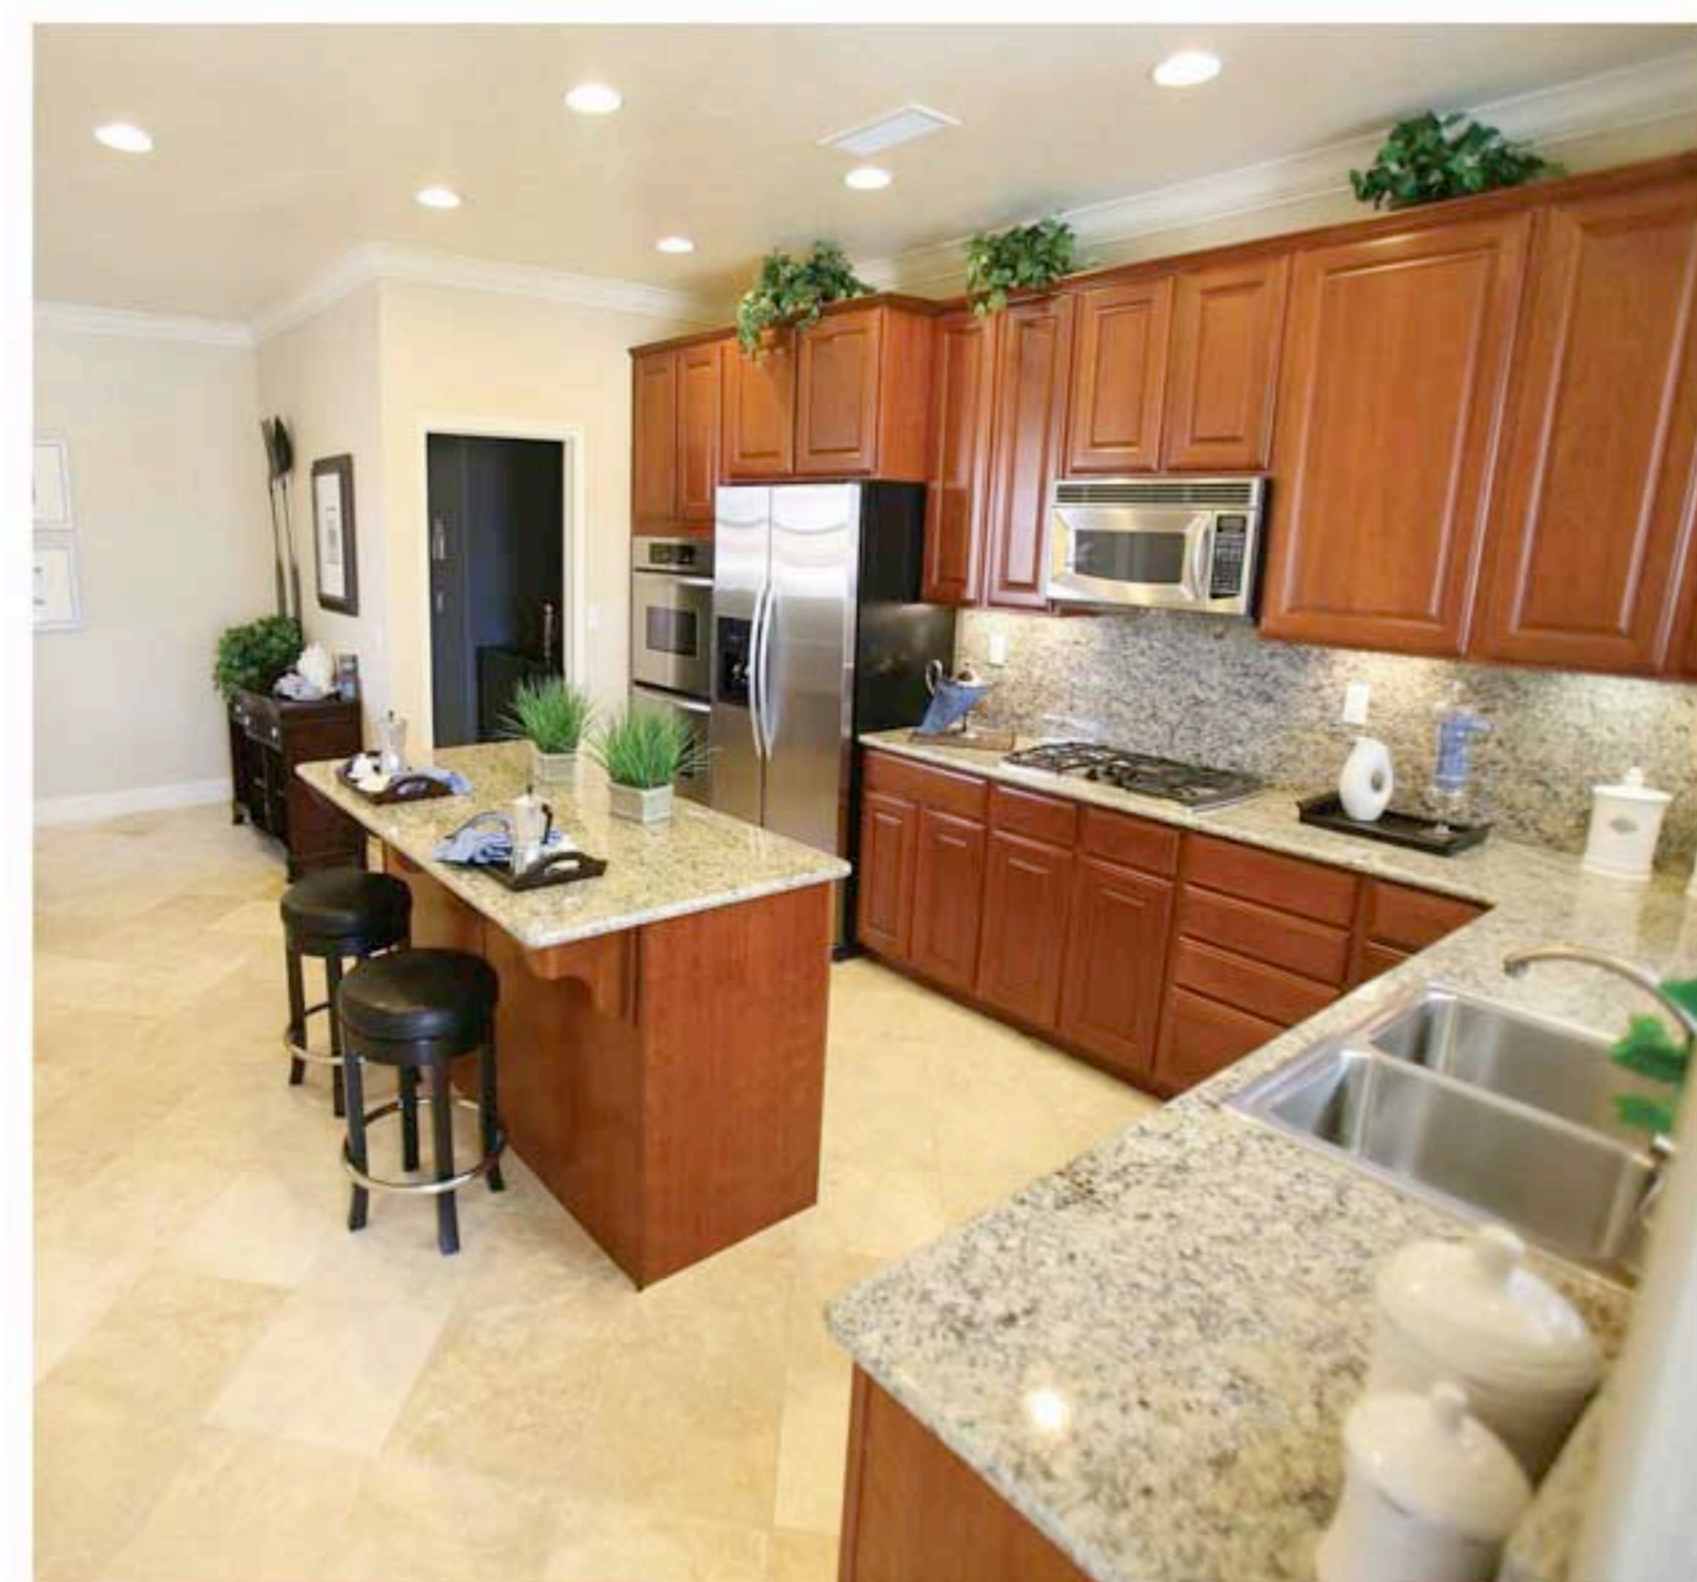

Do the LED ECO LIGHT SHUFFLE :

- 1. Buy LED lights**
- 2. Remove your high energy bulb**
- 3. Put LED bulb in and start saving!**

SWITCH TO LEDs AT HOME :

- Reduce up to 90% off your electricity bill
- LEDs last more than 10 times longer than halogen bulbs
- No need to replace blown bulbs constantly
- LEDs don't generate excess heat, making them safer at home
- LEDs are mercury free, so you can recycle
- Lower your carbon emissions

SAVE MONEY, SAVE TIME, SAVE ENERGY

Prime Minister Gordon Brown is committed to saving energy and has pledged to phase out incandescent and halogen bulbs by 2011. **All businesses and homes will have to replace their light bulbs to energy-saving equivalents.** With an immediate saving of up to 90% of your energy output from lighting, making the switch to LEDs is the easiest way to save energy.

We stock HIGH POWERED GU10, MR16, T8 and T9 fittings, in LUXEON and CREE ranges, with the same brightness as halogen lights. We hold large volumes of spotlights and tube lights, with delivery anywhere in the UK within 48 hours. *Coming soon :* LED Strip Lights and LED Street Lighting.
